Recruiter User Stories

ID	Module	User Story
US-R01	Authentication	As a recruiter, I want to register an account so that I can access the Talvix recruitment platform.
US-R02	Authentication	As a recruiter, I want to log in securely so that I can manage recruitment activities.
US-R03	Organization Management	As a recruiter, I want to register my organization so that I can recruit candidates through the platform.
US-R04	Company Verification	As a recruiter, I want my company to be verified so that candidates can trust my job postings.
US-R05	Job Management	As a recruiter, I want to create job postings so that suitable candidates can apply.
US-R06	Job Management	As a recruiter, I want to edit, publish, or close job postings so that I can manage recruitment requirements effectively.
US-R07	Application Management	As a recruiter, I want to view all applications received for my job postings so that I can evaluate candidates.
US-R08	Candidate Screening	As a recruiter, I want to shortlist qualified candidates so that only suitable applicants proceed to the next stage.
US-R09	Assessment Management	As a recruiter, I want to create coding and MCQ assessments so that I can evaluate candidates' technical skills.
US-R10	Assessment Evaluation	As a recruiter, I want to review assessment results so that I can identify the best-performing candidates.

US-R11	Interview Management	As a recruiter, I want to schedule interviews for shortlisted candidates so that I can assess them further.
US-R12	Communication	As a recruiter, I want to communicate with candidates through the platform so that recruitment-related information can be shared efficiently.
US-R13	Hiring	As a recruiter, I want to select suitable candidates and send job offers so that vacancies can be filled successfully.
US-R14	Rejection Management	As a recruiter, I want to reject unsuitable candidates so that the recruitment process remains efficient.
US-R15	Analytics	As a recruiter, I want to view recruitment analytics so that I can monitor hiring performance and improve recruitment strategies.
US-R16	AI Candidate Matching	As a recruiter, I want AI to recommend the best candidates based on job requirements so that the screening process becomes faster and more accurate.
US-R17	AI Question Generation	As a recruiter, I want AI to generate assessment questions based on job skills so that I can prepare relevant evaluations quickly.
US-R18	Job Scam Detection	As a recruiter, I want the system to analyze my job posting before publication so that accidental policy violations or suspicious content can be identified.
US-R19	Notification Management	As a recruiter, I want to receive notifications about new applications, assessments, and interview confirmations so that I can respond promptly.
US-R20	Account Management	As a recruiter, I want to update my profile and organization details so that the information displayed to candidates remains accurate.

Admin User Stories

ID	Module	User Story
US-A01	Authentication	As an admin, I want to log in securely so that I can manage the Talvix platform.
US-A02	Dashboard	As an admin, I want to view an overview of users, jobs, applications, and system activity so that I can monitor the platform effectively.
US-A03	User Management	As an admin, I want to view and manage candidate and recruiter accounts so that the platform remains organized and secure.

US-A04	User Management	As an admin, I want to activate, suspend, or deactivate user accounts so that I can prevent misuse of the platform.
US-A05	Organization Management	As an admin, I want to verify recruiter organizations so that only legitimate companies can post jobs.
US-A06	Job Management	As an admin, I want to review reported or suspicious job postings so that fraudulent jobs can be removed.
US-A07	Scam Detection	As an admin, I want to review AI-generated scam detection reports so that I can take appropriate action on flagged job postings.
US-A08	Assessment Management	As an admin, I want to monitor assessments and examination activities so that platform integrity is maintained.
US-A09	Report Management	As an admin, I want to receive and manage reports submitted by users so that complaints are resolved efficiently.
US-A10	Notification Management	As an admin, I want to send announcements and notifications to candidates and recruiters so that important information reaches all users.
US-A11	Analytics	As an admin, I want to view platform analytics and usage statistics so that I can evaluate overall system performance.
US-A12	Audit Logs	As an admin, I want to access audit logs of important system activities so that security incidents can be investigated.
US-A13	Content Management	As an admin, I want to manage platform content such as announcements, FAQs, and help resources so that users receive up-to-date information.
US-A14	System Configuration	As an admin, I want to configure platform settings so that the system operates according to organizational policies.
US-A15	Backup and Recovery	As an admin, I want to monitor system backups and recovery operations so that platform data remains safe and recoverable.

AI System User Stories

ID	Module	User Story
US-AI01	Job Skill Extraction	As the AI service, I want to extract skills from job descriptions so that candidate matching becomes more accurate.
US-AI02	Candidate–Job Matching	As the AI service, I want to compare candidate profiles with job requirements so that the most suitable candidates are recommended.
US-AI03	Resume Analysis	As the AI service, I want to analyze resumes so that recruiters receive meaningful candidate insights.
US-AI04	Career Recommendation	As the AI service, I want to recommend career paths and relevant job opportunities so that candidates can make informed career decisions.

US-AI05	Skill Gap Analysis	As the AI service, I want to identify missing skills in a candidate's profile so that personalized learning recommendations can be provided.
US-AI06	Assessment Question Generation	As the AI service, I want to generate assessment questions based on required job skills so that recruiters can quickly create relevant tests.
US-AI07	Performance Analysis	As the AI service, I want to analyze assessment results so that candidates receive detailed performance feedback and recruiters gain evaluation insights.
US-AI08	Job Scam Detection	As the AI service, I want to analyze job postings for suspicious patterns so that fraudulent or misleading job advertisements can be identified before publication.
US-AI09	Recruiter Recommendation	As the AI service, I want to recommend the best candidates to recruiters based on job requirements so that hiring becomes faster and more efficient.
US-AI10	Continuous Learning	As the AI service, I want to improve matching accuracy using historical recruitment data so that future recommendations become more relevant.

External Service User Stories

ID	Module	User Story
US-ES01	Judge0 Integration	As the Judge0 service, I want to compile and execute candidates' coding submissions securely so that assessment results are generated automatically.
US-ES02	Email Notification	As the email service, I want to send verification emails, password reset links, interview invitations, and offer notifications so that users receive important updates.
US-ES03	Calendar Integration	As the calendar service, I want to schedule interview events and generate meeting invitations so that recruiters and candidates can attend interviews on time.

US-ES04	Meeting Service	As the meeting service, I want to generate secure virtual meeting links so that online interviews can be conducted seamlessly.
US-ES05	Cloudinary Storage	As the file storage service, I want to securely store resumes, profile images, and company documents so that users can access them whenever required.
US-ES06	Notification Service	As the notification service, I want to deliver real-time application, assessment, interview, and hiring notifications so that users stay informed about recruitment activities.
US-ES07	Authentication Provider	As the OAuth provider, I want to authenticate users through Google or LinkedIn so that users can log in securely without creating new credentials.
US-ES08	Monitoring Service	As the monitoring service, I want to monitor system availability and service health so that administrators are notified of downtime or failures.
